

Investing in your water future

We're upgrading our water supply main on Winston Road, Sheldon, this month.

It is one of several fire flow improvements we're making to the existing water main network at a cost of \$2.3 million.

The upgrade will improve the performance of the water supply network, ensuring firefighters have reliable access to our water network in case of an emergency.

This year four new mains have been constructed to ensure sufficient flow and water pressure for firefighters.

Water main upgrades - Winston Road, Sheldon

This ongoing project forms part of Allconnex Water's continual works program to provide safe, reliable and high-quality water and wastewater services to our customers.

We thank you for your patience while these vital works are undertaken.

What to expect

Water supply disruption

Winston Road's water supply will be completely shut off for one day this month to complete the work. Affected customers will be notified separately a minimum of 48 hours before any water supply disruption.

Safety

Traffic management will be in place along Winston Road throughout the construction phase.

It is vital that we provide a safe water supply for customers and safe working environment for employees. We kindly ask commuters to take extra care on roads around Allconnex Water work sites.

Works

The Winston Road fire fighting main will be built by open-trench method. Upon completion, the site will be reinstated to its original condition.
