Allconnex Water live and local in Logan

Logan businesses attending this weekend's Live and Local Expo will be encouraged to become Business Watersavers and connect to a sustainable business future.

Allconnex Water's Business Watersaver program assists businesses with the reduction of their water consumption through a variety of water saving initiatives.

A wide range of industries can learn to save water and benefit from the program with focus groups, discussions and networking opportunities while building a more resilient and sustainable community.

"The Allconnex Water staff will be available to inform the public about water and water saving measures for their home and business," said a Allconnex Water spokesperson.

Logan businesses can subscribe to the free quarterly "Water Biz" eNewsletter and be kept up to date with water saving tips, financial opportunities, competitions and initiatives.

The goal is to build capacity and a relationship with organisations so that conservation achievements are sustained, promoted and continuous improvement mechanisms are implemented.

Allconnex Water is working on exciting new projects in Logan including;

- a \$15.4 million reservoir at Round Mountain, New Beith
- creating a \$11.6 million trunk water main at Mt Lindesay Highway covering Jimboomba, Cedar Grove, Cedar Vale and Woodhill
- a \$4.4 million upgrade to our Jimboomba wastewater system
- a \$8.5 million Beenleigh wastewater trunk main

For further information call Allconnex Water on 1300 00 928 (1300 000 WATER) or email info@allconnex.com.au
